

PR20 - Personal role radio set

PN (RN): 2350.000.02

Set consists of PR20 personal role radio and accessories. The PR20 personal role radio operates in 2.4 GHz frequency band using spread spectrum waveform - combination of time hopping, frequency hopping and OFDM (Orthogonal Frequency Division Multiplex). It is primarily designed for operation groups of up to 30 persons (but it also supports networks with unlimited number of participants) allows for full duplex communication in ad-hoc digital networks with no additional infrastructure required. For more details on PR20 personal role radio and other set components see relevant pages of this website.

Components
